

EGG FREEZING OOCYTE CRYOPRESERVATION

THE KEY TO YOUR
FERTILITY
IS THE AGE OF YOUR EGGS

88% OF A WOMAN'S EGG
SUPPLY IS LOST BY AGE 30,
97% BY AGE 40

AT BIRTH, A WOMAN IS BORN
WITH ALL OF THE EGGS
SHE WILL HAVE IN HER
LIFETIME

AN EGG IS THE
LARGEST CELL
IN THE HUMAN BODY

At **AGE 45**, there is a **1%** monthly chance of a live birth

ACCORDING TO WOMENSHEALTH.GOV,

**20% OF WOMEN
WAIT TO HAVE
THEIR FIRST CHILD UNTIL
AFTER 35 YEARS OF AGE.**

WAITING
is the new normal

WOMAN THINK THAT THE CHANCE

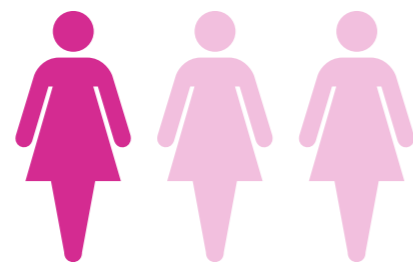

OF PREGNANCY ON THE 1ST
TRY IS APPROXIMATELY
80% AT THE AGE OF 30.

IN REALITY THE CHANCE
IS ABOUT 20%.

**1 IN 8 AMERICAN WOMEN
HAVE FERTILITY ISSUES**

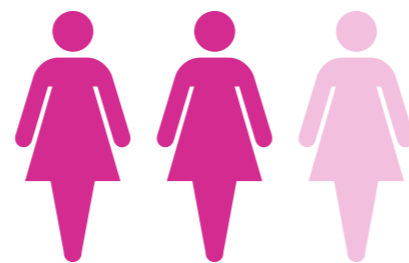

Approximately **one-third**
of women ages 35-39
will suffer from infertility

AGE 35-39

After age 40, more
than **two-thirds** of women
will be affected

AGE 40-44

TAKE CONTROL

Set your own Biological Clock

EGG FREEZING SUCESS RATES

Egg Freezing will impact women's reproductive options as the birth control pill did in the 1960's.

Similar to the Pill, Egg Freezing enables women to take control of their fertility.

We are on the onset of a prodigious social change that will impact women's reproductive futures forever.

(if initially frozen
before age 35)

THE STEPS OF EGG FREEZING

Egg Freezing (Oocyte Cryopreservation) is the process of extracting, freezing and storing woman's eggs. Egg freezing allows a woman to suspend her ticking biological clock and bank her eggs for future use.

Egg freezing is analogous to an insurance policy for your future fertility.
